

ENGINEERING: A HANDS ON FUTURE

Are you a girl with an interest in science, math, technology or engineering?
Do you like to learn how and why things work and how to make them better? If so, then engineering might be a career for you!

Come to the **Milwaukee School of Engineering** on **Saturday, February 17th** from 10:00am-3:00pm to experience “Engineering: A Hands On Future” a **free** hands on exploration of engineering disciplines hosted by MSOE’s Society of Women Engineers. This special annual event will feature three activities hosted by MSOE professors from your choice of: Architectural, biomedical, biomolecular, computer/software/computer science, electrical, industrial, or mechanical engineering disciplines. These activities are centered on the engineering disciplines of your choice, and parents and family members are more than welcome to participate and come learn about the field of engineering!

Register by February 10th at the link below to participate.
